

Chicago, IL – February, 2008

Prospect City announced it has added online credit card processing as an option for its clients.

“Prospect City’s client portfolio has tripled over the past twelve months and we added the ability to process via credit cards based on client requests. Our service prices are fixed and relatively low, allowing clients to automate the process of payment on a monthly basis with our firm. In today’s world of expanded electronic payment, this is a natural step for us. Factor in the time saved on both ends along with a reduction in paper, and this becomes even more important.” said Robert Stein, President.

In addition to the infrastructure services described below, Prospect City remains the leader in connecting recruiters and corporate HR executives to professional researchers through its online Exchange Hub (<http://hub.prospectcity.com>) which has a membership of almost 1,000 professional researchers on five continents specializing in every industry and function. In addition to directing research initiatives, Prospect City serves as matchmaker, bringing researchers to those in need of research. Membership is available for \$60/mo.

Prospect City is an infrastructure services provider to executive recruiting firms and corporate recruiting functions within large organizations. The company provides technology (database, VoIP phone systems, IM, websites and email) along with research, administration and accounting services to executive search firms.
